6 insane speakers for the filthy rich

5. Procella Audio P815

Perching Procella's wedgy P8 mid/high frequency loudspeaker atop its boxy 15-inch woofer on a swivel makes for a tall (nearly 44 inches) and an odd-looking combo reminiscent of Max Fleischer's animated robots from the 1940s. But Procella knows from sound — the Swedish company created the reference theater for DTS's London headquarters, necessitating a system charged with reproducing demanding 96/24 source material for platinum-eared engineers and execs. This is the company's 700-watt flagship speaker for the roomy home and a neo-Cubist sensibility. Price: \$18,000 a pair.
